

UNIVERSAL PROTECTION KIT

Complete cleaning kit

- ▶ Used for cleaning up organic liquids while protecting the employee from soiling and infection risks
- ▶ Contains all necessary components to :
 - Protect the user
 - Congeal the liquid waste to facilitate its collection
 - Remove the waste
 - Clean and disinfect the spoiled surface

APPLICATIONS

- ▶ UPK is used in the transport industry (aircrafts, trains, buses, ...) when a passenger is sick, in case of spillage such as vomit, urine, secretions or liquids.

APPROVALS

- ▶ Conform to the ICAO recommendations

USES

1. Position the mask so as to protect the nose and the mouth. The visor must protect the eyes.
2. Put on the overall so that it covers the top of the body and the arms.
3. Evenly spread the powder on the fluid (vomit, urine, etc.) and allow to congeal for a few minutes.
4. Put the gloves on.
5. Collect the waste using the scoop and scraper.
6. Spray the disinfectant over the surface and wipe with the paper cloth.
7. Put all the waste in the yellow bag. The full bag must be considered as potentially infectious waste.
8. Discard the gloves in the waste bag and disinfect hands with the antibacterial wipe.

Use biocides with caution. Before use, read the label and information concerning the product.
