

KI-KLEEN

Concentrated cleaner Cabin interior surfaces

KI-KLEEN is a no-rinse product for fast cleaning, which completely removes any dirt, dust or grease from smooth and porous surfaces, as metals, plastics, textiles and leather. Protects surfaces against soiling and stains, it gives bade surfaces their original brilliance.

Suitable for everyday use, KI-KLEEN contains readily biodegradable combination of surfactants and a refreshing perfume.

Through its neutral pH, KI-KLEEN ensures a mild cleaning effect, does not alter plastic materials, leather, and does not corrode metals. Compatibility with surfaces (metals, polycarbonates...) was demonstrated according to aeronautic standards.

Free from any risk phrases (see MSDS), KI-KLEEN is safe for humans and has a very good skin tolerance. Nevertheless, wearing gloves is recommended if frequently used.

APPLICATIONS

- Professional use
- Specially developped for cabin interior cleaning, deep-cleaning, transit, night-stop (cabin, toilet, galley, cockpit). For screens, it is recommended to use Screenpad 3000.
- Can be used for interior cleaning of trains and boats.

APPROVALS

Aeronautic approvals :

AIRBUS	BOEING
AMS 1550B	BOEING D6-7127

USES

To be diluted at 3% or 15% before use depending on level of soilings.

Hard surfaces:

Spray onto surfaces. Wipe off with a cloth to eliminate residues.

- For tough stains, leave it to act for one minute and/or use a dry or wet cloth
- For stains caused by luggages on ABS surfaces, use magic sponge.
- For porous surfaces (plastified PVC in galleys), remove dirt using a soft brush.

Proceed to rinsing if surfaces are in direct contact with food.

Carpets:

To ensure that the product does not stain at the dose to be used, try a small test area to determine before use.

1. Spray onto carpets manually or with dedicated machine (Spray-jet).
2. Leave it to act for 5 minutes, then use injection/extraction cleaning machine (Injet 145)

Glasses and windows:

1. Cleaning should be performed with a 3% dilution.
2. Wipe off with a dry cloth.

Fabrics:

To ensure that the product does not stain at the dose to be used, try a small test area to determine before use.

Spray the diluted Ki-Kleen on the stain and surrounding area. Wait between few seconds to 2 minutes. If needed scrub with a soft cloth. After that, use a clean cloth and wipe the surface.

CHARACTERISTICS

Non ionic surfactants, excipients, perfume, die.

Appearance: Liquid
Color: Blue
PH: neutral
Density: 1.00
Shelf life: 24 months (under study for 36 months)

PACKING

	Perfume	Product code	Carton per pallet	Carton per layer	Number of layers	Pallet size (cm)	Height pallet (cm)
